

HANDOUT #4

Case 2: Stories

Task: Create a story based on the educational topic below:

Infantile botulism

- Typically presents with constipation, weakness, decreased oral intake, hypotonia, and weak cry
- Pathophysiology
 - occurs when spores are ingested
 - Usually associated with construction
 - Highest cases in UT, PA, and CA
- Diagnosis
 - Stool toxin for botulinum
 - EMG
- Treat
 - Provide respiratory support as needed until symptoms resolve
 - baby BIG- human derived botulinum antitoxin

How to access stories

1. Go to your handle (the rightmost circle that should feature your picture)
2. Click on the blue plus sign next to your picture in the top right corner, this should open your camera
3. Swipe to the right until you get to “type”
4. Type in information you'd like to share in a snapshot.
 - a. After you type in words you would like to add, click on the round arrow to cement it
 - b. Access other special features (gifs, music, polls, etc) by swiping up
5. When you are done, click on the left bottom button with your picture to post to your story
6. If you need to delete
 - a. Click on the “...” on the right bottom corner of your story
 - b. Click on “delete”
