Helpful References for global health resident evaluation in international settings

No standard metrics exist currently for the assessment and evaluation of residents engaged in international global health rotations.

Specific skills residents can demonstrate and be evaluated for during their international global health rotations include:

- New knowledge and skills
- Empathy
- Humanism
- Cultural humility
- An awareness of their own expertise
- An understanding of the expertise of their supervisors
- Understanding of practicing within level of training
- Understanding of limitations in resources
- Ability to display effective interactions with colleagues
- Ability to engage in appropriate help-seeking behaviors

Assessment of objectives unique to global health rotations may not be included in currently available evaluation tools:

I. Identify ways in which global health rotations provide unique opportunities to assess acquisition of milestones and competencies essential to pediatric training.

II. Identify key parameters of resident performance that should be evaluated by US global health faculty mentors and supervising faculty at the global health partner site.

1. ACGME Program Requirements for Graduate Medical Education in Pediatrics. Proposed Effective Date: July 1, 2013.

III. Develop strategies and improve tools to facilitate meaningful formative feedback and evaluation about resident performance in international global health settings.
