The Academic General Pediatric Fellowship Program at Baylor College of Medicine is currently accepting applicants for July 2017. Our three-year accredited fellowship offers 3 individualized curricular tracks with 70% of the fellow’s time dedicated to research, teaching, advocacy and leadership training. The remaining 30% of time is spent precepting medical students and residents. All fellows will complete either a Masters in Public Health or a Masters in Education.

1. **Educational Scholarship and Leadership Track**
   - Become a “scholar-in-residence” at the Center for Research, Innovation and Scholarship in Medical Education, which includes working alongside leading pediatric educators and having access to a full time statistician, medical writers/editors and numerous educational projects.
   - Acquire skills in medical education research, leadership skills and practical experience in developing curricula, creating evaluation tools, and integrating technology into teaching across the educational continuum.

2. **Global Health Leadership and Research Track**
   - Clinical research opportunities focused on HIV/AIDS, tuberculosis, malaria, malnutrition and other conditions impacting the health and well being of children and families worldwide.
   - Diploma Course in Tropical Medicine (optional)
   - International experience (optional)- 6 months over the course of the fellowship
   - Clinical experiences precepting learners in diverse community-based clinics that address the needs of underserved communities.

2. **Health Services Research Track**
   - An emphasis on underserved populations and a section research portfolio consisting of NIH funded studies on health disparities, obesity, and children with special health care needs.
   - Faculty mentors who have expertise in health services research and behavioral interventions.
   - Access to large local data sources including the Texas Children’s Immunization Project and Texas Children’s Health Plan.
