

Blood and Marrow Transplantation (BMT) Hospitalist at Children's National Medical Center

- **Nocturnist Position**

The BMT Division of Children's National Health System is seeking a full-time, BE/BC pediatrician to join our BMT Service as a Nocturnist to manage BMT and uncomplicated chemotherapy patients overnight. This full time position consists of three 12 hour night shifts per week. Job duties include:

- Provide primary care for BMT inpatients, oncology and hematology inpatients on the nurse practitioner service
 - Assess patient's status repeatedly as clinically indicated, including transfer to ICU if necessary
 - Review all labs and imaging results, and treat appropriately. This may include the start of antibiotics or other critical therapies, in consultation with the ICU medical staff
 - Seek nighttime consultation of ICU or surgical services, as well as consultation of other subspecialists as indicated.
- Admissions from the ER at night for BMT patients.
- Transfers to ICU at night for BMT patients.

This is a great opportunity to be involved with a lot of novel transplant therapies being offered such as haploidentical BMT, CAR T cells, and other cellular therapies offered at one of the top children's hospitals in the nation. Children's National Health System includes a 303-bed freestanding children's hospital affiliated with George Washington University. Applicants should have excellent communication and leadership skills, experience in quality improvement, and enjoy working collaboratively with families and other healthcare providers.

Qualifications and Education Requirements: Completion of pediatric residency is required. Graduation from a heme/onc fellowship is desired, but not essential. Candidate must be comfortable in managing patients in the acute care setting. Prior heme/onc experience preferable, but not required.

If interested, please send your CV and contact information to:

David A. Jacobsohn, MD, ScM
Chief, Division of Blood and Marrow Transplantation
