

Pediatric ICU/Pediatric CVICU: OU College of Medicine

The Department of Pediatrics at the University of Oklahoma College of Medicine in Oklahoma City, OK is seeking fellowship trained Pediatric and CV Intensivists. Full-time positions are offered for new and established faculty. We seek motivated individuals and opportunities for basic, translational, and clinical research are encouraged. Combined, the PICU/CVICU admit over 1400 patients per year with a busy congenital heart program performing roughly 250 bypass and 400 total thoracic cases per year. The Children's Hospital at OU Medical Center is building a new 34 bed PICU with anticipated opening next spring. Expansion of the CVICU to 25 beds will be accomplished soon after the new PICU opens. Responsibilities include patient care, supervision and education of housestaff, medical students, and advanced practice providers, participation in a growing sedation program, and clinical or basic science research. Candidates must be Board Certified in Pediatrics and Board Certified/Board Eligible in Pediatric Critical Care or Cardiology, and eligible for licensure in Oklahoma. Rank and salary are commensurate within experience and training.

The Children's Hospital at OU Medical Center has 314 inpatient beds and is the only freestanding pediatric hospital in Oklahoma solely dedicated to the treatment of children. We work closely with several research institutions, such as the Children's Hospital Foundation and the Oklahoma Medical Research Foundation, to support the advancement of research in childhood disease.

OU Medicine has just completed a major transformation and is now an Oklahoma-owned and operated nonprofit. Our new ownership structure fulfills a longtime goal to further advance the state's premier academic health system, elevating patient care, clinical research and the education of health professionals.

Oklahoma City is a wonderful place to work and live, offering abundant cultural and recreational activities, sports venues (including the Oklahoma City Thunder), excellent schools, a variety of affordable housing and a cost of living consistently ranked below the national average. The region offers everything one would look for in a modern metropolitan community and does so without high costs or traffic congestion. With 300 days of sunshine annually, OKC is a distinctly livable city with a rich quality of life.
