

**APPD SEEK One-Year Survey Summary Report :
Entry # 10309**

Principal Investigator (first/last, credentials)

Charlene Rotandi MEd, C-TAGME

Institution

Stanford University

Email

Cdlarson@stanford.edu

Survey Title

Pediatric Program Coordinator Wellness and Job Satisfaction

Date survey distributed to APPD membership (Month/Year)

08/14/2024

Portion of APPD membership surveyed (i.e. Program Directors, Associate Program Directors, Program Coordinators)

Program Coordinators

Response rate (i.e. percentage; xxx/xxx)

52

Summary of main findings (1-3 paragraphs)

52% completion rate - 466/896 APPD program coordinator members

40.7% (N=190) feel often/very often stressed at work

Primary sources of stress identified:

Workload 46.8%

Financial reasons 38%

Personal reasons 33.5%

Feeling unsupported in the role 22.1%

59.2% (N=276) would consider leaving their position today

Presentations

We will be sharing the preliminary data at the 2026 APPD Annual Spring Meeting in Denver, CO. Session titled: "Beyond the Buzz: Removing the Sting from Busy GME Program Administration with AI."

Publications

We are in the process of working with a statistician and writing up the findings for publication, and are considering submitting it to JGME and/or Pediatrics.
