

PEDIATRIC SUBSPECIALTY WEBINAR SERIES

APPD/CoPS Subspecialty Webinar Series: FAQ's for Residents

What's the flow of the night?

- Residents will have the opportunity to enter and leave program's individual breakout rooms at their chosen frequency. It is recommended that residents stay ≤ 8 minutes in each breakout room. Resident's can visit programs/breakout rooms of their choosing.
- Each breakout room will be labeled with the program name, but the name may not match the name you are familiar with, so please ask!
- There will be a "transition room" where you can go between visiting programs
- There may be times when you may be the only resident in the room, but the evening is set up for you to move freely so there is no required time frame to stay in any given room. All program representatives are aware that applicants are trying to optimize seeing the most number of programs! So feel free to move freely.
- Timing Breakdown for the evening:
 - 8:00pm ET:** Welcome; 5-minute welcome from a CoPs/APPD Representative.
 - 8:05pm - 9:25pm ET:** Breakout rooms for all programs (recommend that residents stay ≤ 8 minutes in each breakout room). Residents choose which rooms they want to visit.
 - 9:25pm ET:** All breakout rooms will close and all will be brought back to the main room.
 - 9:25pm - 9:30pm ET:** Wrap up/closing remarks

Tips for Residents:

- These sessions are intended to be a casual atmosphere with program leadership and current fellows (There will likely be 1-2 individuals from leadership and 1-2 fellows from each program)
- Introduce yourself
- Come prepared with questions you would like to ask programs, can also be about the area (ie what is it like living there)
- Remember that these are great networking opportunities as these will be your colleagues in your field, regardless of whether you train at their program
- Take this unique opportunity to visit programs that are new to you, you never know what you may find!

Technical Requirements:

- We will be using Zoom for the session. Be sure to download the latest version of Zoom. <https://zoom.us/download>
- Please ensure your microphone and camera are working – we are encouraging connectivity!
